

Policy Statement

Global Registrar of Systems (GRS) is committed to providing high quality services in a manner which will protect and improve the environment as a whole, and related to its activities, in particular.

We will work closely with all stakeholders to establish the procedures by which we can make a positive contribution towards innovative and cost-effective and sustainable environmental outcomes.

Responsible management of environmental issues is an essential part of achieving GRS business objectives. Accordingly, we are committed to conducting our activities in ways which will:

- Improve our awareness and management of environmental risks, and avoid, reduce and control pollution.
- Comply with environmental legislations and other requirements.
- Promote waste minimisation and energy management.
- Endeavor to be a paperless company and save all records electronically in every possible situation.
- No printing is encouraged unless it is deemed necessary.
- Commit to comply with green environment philosophies.

We, through our management and staff, will ensure our operations comply with this policy by:

- Setting appropriate directions for environmental issues and objectives;
- Establishing systems for auditing, monitoring, and reporting environmental performances;
- Identifying and promptly resolving any non-conformances, and taking necessary changes related to the environmental improvement overall.
